# HIMA SAJEESH KUMAR

AI & Machine Learning Engineer Intern

Bengaluru, Karnataka, India | +91 7306068726 | himasajeesh2005@gmail.com
linkedin.com/in/himasajeeshkumar | github.com/Himasajeeshkumar | leetcode.com/u/Himasajeesh

## EDUCATION

**Bachelor of Technology, Computer Science Engineering (AI & ML)** *Expected 2027*
*JAIN (Deemed-to-be University) | CGPA: 8.35 / 10 (Till Semester VI)*

## PROFESSIONAL SUMMARY

AI and Machine Learning engineering student with internship experience building deep learning and full-stack AI applications. Skilled in Python, TensorFlow, and semantic search techniques, with hands-on work in computer vision, natural language processing, and AI-powered web platforms using React, Node.js, and the Groq API. Focused on applying machine learning and software engineering to solve practical problems.

## TECHNICAL SKILLS

**Programming:** Python, Java, SQL, JavaScript

**AI / Machine Learning:** TensorFlow, Keras, Scikit-learn, Pandas, NumPy, Matplotlib, Deep Learning, Computer Vision, NLP, Semantic Search, Prompt Engineering

**Web Development:** React.js, Node.js, Express.js, HTML5, CSS3, REST APIs

**Tools:** Git, GitHub, VS Code, Google Colab, Jupyter Notebook, npm, Vite

## EXPERIENCE

**Artificial Intelligence Intern — SkillOrbit Pvt Ltd (Remote)** *Jan 2026 – Feb 2026*

- Built an AI code retrieval tool using Sentence Transformer embeddings and FAISS similarity search to return relevant code snippets from the CodeSearchNet dataset based on natural language queries
- Developed an AI resume screening system by fine-tuning a DistilBERT model to classify resumes into 24 job categories, achieving 75.86% accuracy on CPU without GPU training
- Designed a hybrid scoring method combining semantic similarity and skill matching to automate resume shortlisting decisions
- Built interactive interfaces using Gradio and Streamlit to demonstrate both systems end-to-end

**AI/ML Intern — Evoastra Ventures Inc. (Remote)** *Nov 2025 – Dec 2025*

- Prepared and cleaned datasets for an image captioning pipeline, including caption cleaning and tokenization for downstream model training
- Conducted evaluation tracking and documented model performance for a deep learning-based visual captioning system built with TensorFlow

## PROJECTS

**FutureTwin AI — AI-Powered Career Development Platform**
*GitHub: github.com/Himasajeeshkumar/FutureTwin-AI*

- Building a full-stack platform combining resume parsing, ATS scoring, and AI-driven feedback using React.js, Node.js/Express.js, and the Groq API
- Implemented PDF text extraction and a resume builder with PDF export using pdf.js, html2canvas, and jsPDF
- Designing backend modules for resume analysis, job matching, and an AI career mentor powered by prompt engineering

**Visual Caption Generator — CNN-LSTM Image Captioning with Bahdanau Attention**
*GitHub: github.com/Sayaan-cloud/visual-seq-decoder*

- Collaborated in a team to build an image captioning system using a CNN encoder, Bahdanau Attention, and an LSTM decoder trained on the Flickr8k dataset
- Contributed to dataset preparation, caption cleaning, tokenization, and model evaluation using TensorFlow

**AI Code Assistant using Semantic Code Search**
*GitHub: github.com/Himasajeeshkumar/AI-Code-Assistant*

- Built a semantic code search tool retrieving relevant code snippets from the CodeSearchNet dataset using Sentence Transformer embeddings and FAISS similarity search
- Designed a query-to-code retrieval pipeline converting natural language queries into vector embeddings for similarity-based matching
- Built a simple interface using Gradio to demonstrate end-to-end code retrieval from natural language input

## CERTIFICATIONS

- Google AI Essentials — Google
- Introduction to Computer Vision and Image Processing — IBM
- Probability & Statistics for Machine Learning & Data Science — DeepLearning.AI
- Foundations of Data Science and Machine Learning with Python — Packt
- Build a Machine Learning Web App with Streamlit and Python — Coursera
- 100 Days of Code: The Complete Python Pro Bootcamp — Udemy
