HIMA SAJEESH KUMAR

Software Engineering Student | Full-Stack & Backend Development

Bengaluru, Karnataka, India | +91 7306068726 | himasajeesh2005@gmail.com
linkedin.com/in/himasajeeshkumar | github.com/Himasajeeshkumar | leetcode.com/u/Himasajeesh

PROFESSIONAL SUMMARY

Computer Science student with hands-on experience building full-stack web applications and backend systems using React.js, Node.js, and REST APIs. Skilled in Python, Java, and SQL, with practical experience designing search-based backend tools, integrating APIs, and building interactive interfaces for end-to-end applications.

EDUCATION

Bachelor of Technology, Computer Science Engineering (AI & ML) Expected 2027
JAIN (Deemed-to-be University) | CGPA: 8.35 / 10 (Till Semester VI)

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL, JavaScript
Web & Backend Development: React.js, Node.js, Express.js, REST APIs, HTML5, CSS3, Vite
Tools & Platforms: Git, GitHub, VS Code, npm
Applied AI (supporting): Prompt Engineering, Vector Search / FAISS, TensorFlow

EXPERIENCE

Artificial Intelligence Intern — SkillOrbit Pvt Ltd (Remote) *Jan 2026 – Feb 2026*

- Built a code retrieval tool using vector embeddings (Sentence Transformers) and FAISS similarity search to return relevant results from natural language queries
- Developed a resume classification system by fine-tuning a machine learning model, reaching 75.86% accuracy on CPU without GPU training
- Designed a hybrid scoring algorithm combining similarity metrics and rule-based matching to automate decision logic
- Built and deployed interactive web interfaces for two systems end-to-end using Gradio and Streamlit

AI/ML Intern — Evoastra Ventures Inc. (Remote) *Nov 2025 – Dec 2025*

- Built and maintained a data processing pipeline for a machine learning system, including data cleaning and tokenization
- Tracked and documented evaluation results for a TensorFlow-based system, supporting iterative model improvement

PROJECTS

FutureTwin AI — Career Development Platform (Full-Stack Web Application)
GitHub: github.com/Himasajeeshkumar/FutureTwin-AI

- Building a full-stack platform using React.js and Node.js/Express.js, integrating a third-party API for resume parsing, ATS scoring, and automated feedback
- Implemented PDF text extraction and a resume builder with PDF export using pdf.js, html2canvas, and jsPDF
- Designing backend modules for resume analysis and job matching as independent, reusable services

AI Code Assistant — Semantic Code Search Tool
GitHub: github.com/Himasajeeshkumar/AI-Code-Assistant

- Built a backend search tool retrieving relevant code snippets from a large dataset using vector embeddings and FAISS similarity search
- Designed a query-to-result retrieval pipeline converting natural language input into vector embeddings for similarity-based matching
- Built and deployed an interactive interface using Gradio for end-to-end demonstration

CERTIFICATIONS

- Google AI Essentials — Google
- 100 Days of Code: The Complete Python Pro Bootcamp — Udemy
